

CONTENT VALIDITY STATEMENTS

To be completed by CE Course Faculty/Presenter.

Please review and check the boxes next to each of the content validity statements below:

I will only make recommendations for patient care based on current science, evidence, and clinical reasoning, while giving a fair and balanced view of diagnostic and therapeutic options.

I will ensure that all scientific research referred to, reported, or used in this educational activity in support or justification of patient care recommendations conforms to the generally accepted standards of experimental design, data collection, analysis, and interpretation.

I will clearly identify new and evolving topics — for which there is a lower (or absent) evidence base — within my presentations.

I will avoid advocating for, or promoting practices that are not (or not yet) adequately based on current science, evidence, and clinical reasoning.

My presentation will exclude any advocacy for, or promotion of, unscientific approaches to diagnosis or therapy, or recommendations, treatment, or manners of practicing healthcare that are determined to have risks or dangers that outweigh the benefits or are known to be ineffective in the treatment of patients.

I attest that I have reviewed and agree to the above content validity statements
